

The White Mountain Hearth Log Collection

Empire manufactures log sets and burners to suit any application. With sizes ranging from 16 inches to 30 inches, and log pieces ranging from slender to massive, the White Mountain Hearth collection is sure to have the perfect set to fill your fireplace. We offer ceramic fiber, traditional refractory concrete, and Burncrete® logs. Each log set is hand-painted to bring out the rich detail. All of our burners are available in Natural Gas and LP models.

Our Slope Glaze and Contour Vented/Vent-Free Burners are approved for use in any certified vent-free firebox. They may be installed in an existing wood-burning fireplace, with the damper closed, to operate as a vent-free heating system. Millivolt and manual burners are also certified for installation as vented log sets, so long as the installer blocks the fireplace damper partially open. A special flue-damper clamp is included with the burner. A vented burner is not a heating system and may not be operated by a thermostat.

Slope Glaze Burners and Matching Log Sets

- 16, 18, 24 and 30-inch Vented/Vent-Free Burners – up to 38,000 Btu
- Millivolt, Manual, Direct Ignition, and Intermittent Pilot models
- Choose from Refractory, Ceramic Fiber, or Burncrete® Log Sets
