

24-inch Loft Series burner with Brushed Stainless Steel Decorative Top shown in an existing masonry firebox

### Unconventional Styling, Contemporary Flair, Astonishing Good Looks

Because it does not require a chimney or metal vent stack, where you install your vent-free Loft Series burner or fireplace is limited only by your imagination – in a wall, in an island, in a mantel, in an art installation – the possibilities are boundless.

Loft Series burners install in any certified vent-free firebox or masonry fireplace to help complete your artistic statement. They operate as a vent-free system for supplemental heating. Millivolt systems can be installed in a vented fireplace to provide the ambiance of a fire but without the heat. IP systems include a thermostat remote and must be installed as a Vent-Free system only.

Available in LP and Natural Gas models in 18-inch (26,000 Btu), 24-inch (36,000 Btu), and 30-inch (40,000 Btu), there’s a Loft Series Burner sized perfectly for your fireplace. There is even a special 18-inch (10,000 Btu) Millivolt Loft burner for bedroom applications – where allowed by code.

24-inch Multi-sided Loft Series burners can be installed in any certified vent-free or masonry see-through or peninsula firebox.

All Loft Series burners are available in remote-ready Millivolt system with a manual Piezo Ignition or Battery Operated Remote Control Intermittent Pilot that allows you to have a standing pilot or operate with an intermittent pilot to save gas.

## Loft Contemporary Vent-Free Fireplaces and Inserts

Loft Series Vent-Free Fireplace and Metal Frame with Glass Panel

### The Loft Series Fireplace

The unique Loft Series Fireplace includes a Loft burner in a compact and complete system. This versatile unit installs as a zero-clearance vent-free fireplace or as an insert in an existing fireplace.

Available in 28,000 Btu, 20,000 Btu, and 10,000 Btu the 99% efficient Loft Fireplace will quickly warm your living space – and grab your attention.

Choose the Millivolt system and select one of seven control options – from a simple wall switch to a thermostat remote to the ultimate programmable remote. Or choose the Intermittent Pilot system, which includes a variable flame-height remote control with integral thermostat.

Finish your fireplace installation with one of Empire's two distinctive decorative fronts. The ultra-clean frameless tempered glass front features rounded and polished edges and a silkscreened black border. With its minimally visible hardware, the glass pane "floats" in front of the fireplace.

For a more traditional look, choose the simple, elegant black metal frame with glass panel. This four-sided frame, with its 1 3/4-inch depth, provides the perfect transition to drywall, tile, or other material.

Installed as an insert, your Loft system will require the three-sided decorative surround. Like the four-sided frame, this surround measures 1 3/4-inch deep and makes a clean transition from an existing fireplace.
